

## LION GUN® WHEEL KIT

Fleet Maintenance companies throughout the world are aggressively seeking a portable power tool that offers accuracy, documentation, and safety advancement. The LION GUN Wheel Kit is the ultimate and affordable wheel bolting solution for anyone responsible for Fleet Maintenance.

### EFFORTLESS TORQUE

Our industry-leading sockets and extensions provide the most ergonomic experience a user could ask for. The weight of the tool is supported by its connection to the wheel, taking the strain and effort away from the user. The LION GUN delivers torque from 75-750 ft lbs (101-1016 Nm).

### EVERYTHING YOU NEED

The HYTORC Wheel Kit comes ready to use. Simply open the case and put the battery on the tool, it has everything you need to get to work. Two batteries and a charger means you're always ready to go.

### DATA COLLECTION

In today's day and age accurate data has become more important than ever before. The LION GUN Series of torque tools are designed to capture this data. Data collection is available at the push of a button in both physical printouts and standard spreadsheet formats.
